

Intelligent Document Processing (IDP) – Convert Any Document Into Structured Data in Seconds

If you are looking for the best data extraction solution for any document, then you should try Acodis.

Acodis has been dedicated to business document automation since its inception in 2016 and, powered by machine learning, enables automated processing of any document within seconds. This replaces manual document transfers and allows the extracted data to be exported in a desired format. Every year, more than 40 clients in six countries process more than 1.3 million documents with Acodis.

INTELLIGENT DOCUMENT PROCESSING (IDP) IN THREE STEPS:

CAPTURE

Classification, Extraction & Validation

Get structured data from any document with machine learning – in seconds.

AUTOMATE

Document Processing Workflows

Build and combine document processing workflows with a few click – no coding required.

SCALE

Share and Deploy Workflows

Automate at scale by sharing structured data within your organization and make faster business decisions.

Testimonial

«We have been able to free our operational staff from monotonous, repetitive, un motivating manual data entry activities, so that they can focus on higher value and more important tasks in their core competency. »
