

Accelerate Your Document Processing

Automate more, scale faster and improve customer experience

Automated data extraction is here. Acodis turns any document, in any language, into structured data in seconds. It then feeds into other systems across your business quickly and at scale.

The result? Accurate, high-quality data, greater business efficiency, and more time for high-impact work.

- Works in any language
- Powered by AI. No coding required
- Extract text, images, and structures (e.g., titles, tables, charts)

About Acodis

Acodis is dedicated to the data extraction and structuring from business documents since its founding in 2016.

Intelligent Document Processing (IDP) – powered by machine learning – enables automated processing of any document within seconds, replacing manual document transfers and allowing data to be exported in a structured format.

Acodis is based in Winterthur, Switzerland, and employs over 30 people.
